

NetTrekker, Power Library & Online World Book Encyclopedia

Student Access Information

Please use the following procedure in your classrooms for student, access to NetTrekker, Power Library and the online World book Encyclopedia.

1. Launch compass.
2. Teacher or Instructional Aide enters compass Login. **Note:** Five usernames have been created for each classroom.

Compass Usernames:	Reference 103-1
	Reference 103-2
	Reference 103-3 PW = s-----
	Reference 103-4
	Reference 103-5
	Reference 103-6

3. Teachers or Instructional Aide enters the password.

To give students access to these reference tools, low security in compass is needed. Low security takes the student to the specified website and then permits him/her to redirect the Internet Explorer browser to any site that passes the district's k-12 filters. By using these usernames and passwords in Compass, the students only have access under low security with the teacher's knowledge. Students cannot use the logins during recess since they will not know the password.

4. Finally, If you have logged in a student with these usernames and password, be sure that he/she logs out.

Reminder: It is important that your students have signed Internet contracts before using the internet. This district policy is for the protection of your students and you.

Please contact Sharon Chambers if you have any questions.
